

MEGANATH M

SOFTWARE ENGINEER

+91 8870064670

Chennai, Tamil Nadu

meganath.mariappan@gmail.com

ABOUT ME

Software Engineer with a strong foundation in Java Full Stack Development, specializing in Java, Spring Boot, Hibernate, JPA, SQL, and RESTful APIs. Experienced in designing and developing scalable web applications through academic and professional projects, with hands-on exposure to Agile development practices. Passionate about building efficient backend systems, solving complex problems, and continuously learning modern technologies to deliver high-quality software solutions.

EXPERIENCE

2025 - now

Software Engineer

CAPGEMINI

- Working on enterprise software development with Java as a core technology, contributing to full-stack application development using Java, Spring Boot, Hibernate, JPA, JDBC, and SQL.
- Building and enhancing frontend applications using React and TypeScript, integrating frontend components.
- Performing test automation and API/UI testing using Playwright, developing automated test scenarios to improve application quality and reliability.

SKILLS

TECHNICAL :

- Languages: Java, Python, SQL
- Backend: Spring Boot, Spring MVC, Hibernate, JPA, JDBC
- Frontend: HTML, CSS, JavaScript, React, Typescript
- Database: MySQL
- Tools: Git, GitHub, Postman, Antigravity, Claude, Playwright
- Concepts: OOP, Collections, Exception Handling, REST APIs, Multithreading, TCP/IP, Firewall basis

SOFTSKILL :

- Problem Solving & Analytical Thinking
- Communication Skills & Team Collaboration

PROJECTS

Employee Management System

Tech Stack: Java, Spring Boot, Hibernate/JPA, MySQL

- Developed a full-stack Employee Management System with CRUD
- Built REST APIs using Spring Boot integrated with MySQL.
- Implemented employee search, update, delete and pagination.
- Tested APIs using Postman and managed source code with Git.

A web-based Employee Management System to streamline employee record management. Implemented CRUD operations, RESTful APIs, and database integration to efficiently manage employee information while following MVC architecture and object-oriented programming principles.

Artificial Vision Based Fire and Smoke Recognition Using YOLO

Tech Stack: Python, YOLOv8, Frontend Development, MySQL

- Built an AI-powered fire and smoke detection system using YOLO.
- Trained and evaluated the model on image datasets.
- Integrated OpenCV for real-time video processing.
- Optimized detection accuracy and reduced false positives.
- Demonstrated early fire detection for surveillance scenarios.

Artificial Vision Based Fire and Smoke Recognition Using YOLO Algorithm
Developed an AI-based fire and smoke detection system using Python, YOLOv8, and OpenCV for real-time monitoring. Trained the model on image datasets to accurately detect fire and smoke, improving early detection and supporting faster emergency response.

EDUCATION

2020 - 2025	Bachelor of Engineering B.E
V.S.B. Engineering college	Bachelor of Engineering graduate in Computer Science and Engineering with expertise in problem-solving with significant CGPA of 7.25
2019 - 2020	Computer Science & Mathematics
Higher secondary	Completed Higher Secondary education with a focus on logical thinking, programming concepts with significant percentage of 80%
2018 - 2019	SSLC
Secondary School	Built a solid academic foundation with strong problem-solving, communication, and learning skills with significant percentage of 80%

CERTIFICATIONS

- Oracle Cloud Infrastructure 2024 Generative AI Certified Professional
- Google Cloud Computing Foundations
- Basics of Java – Infosys Springboard

Java Full Stack Development Specialization – Udemy

- Java
- Advanced Java
- Spring Boot
- Hibernate & JPA
- SQL
- Microservices
